

Standard Operating Procedure

Pipedrive CRM Updates, Follow-Up Tracking & Monthly Reporting

DOCUMENT
SOP-CRM-01 | Version 1.1

OWNER
Princess Erika Mahinay

EFFECTIVE
October 2026

APPLIES TO
Pipedrive CRM support

Note: This SOP accompanies the September 2026 Monthly Performance Report. All company names, project names, amounts, and timeframes are fictional sample content. Pipedrive menu names and available features can vary by plan and account setup.

1. Purpose and scope

To keep every deal in Pipedrive accurate, current, and easy to find, so follow-ups are not missed and the monthly report can be built straight from Pipedrive without reconciling by hand. This procedure covers every residential, rental turnover, and commercial opportunity from first inquiry to closeout. Each figure in the Monthly Performance Report is pulled from records kept to this standard.

2. How the report maps to Pipedrive

IN THE REPORT	IN PIPEDRIVE
Project / opportunity	Deal, linked to a Person and an Organization
Pipeline stage	Stage in the project pipeline
Closed project	Deal marked Won, with the final value entered
Declined or dead opportunity	Deal marked Lost, with a Lost reason
Follow-up	Activity (call, email, task, or deadline) scheduled on the deal
Pending follow-up	Activity that is overdue or not yet marked as done
Priority item	Deal with the Priority label
Stalled record	Rotting deal (no update within the stage's rotting days)
Monthly figures	Saved filters and Insights reports

3. Pipeline stages

Every open deal sits in exactly one stage and is moved the same day its status changes. Closed is not a stage: finished work is marked Won.

STAGE	WHAT IT MEANS	REQUIRED NEXT ACTION	ROTTING
New / Unreviewed	Inquiry logged, not yet reviewed	Review within 1 business day	1 day
Qualified	Fit and scope confirmed	Assign owner; schedule estimate	3 days
Bidding / Estimate	Estimate or bid being prepared	Set Bid deadline; add deadline activity	5 days
Proposal Sent	Proposal out, awaiting decision	Follow up per Section 5	7 days
Awarded	Client has approved the work	Add scope notes; schedule next step	2 days
In Progress	Work is underway	Add a status note weekly	7 days
Won (Closed)	Work complete, final value recorded	Complete closeout (Section 6)	n/a

4. Routine updates

DAILY

1. **Add new inquiries.** Use + Deal, link the Person and Organization, add project type, source, and value, and place it in New / Unreviewed.
2. **Work the Activities list.** Open everything due today and overdue, complete it, and click Mark as done with a short outcome note.
3. **Schedule the next activity** on every deal you touch, so no open deal is left without a next step.
4. **Apply the Priority label** to time-sensitive proposals, client replies, and project actions.
5. **Drag the deal to its new stage** as soon as its status changes.

WEEKLY

- Open the saved filter for rotting deals and update or reschedule each one.
- Open the saved filter for deals with no next activity and schedule one.
- Check the Bid deadline field on Bidding / Estimate deals for the next two weeks.
- If Pipedrive automations are in use (for example, creating a follow-up activity when a deal moves to Proposal Sent), confirm they are still firing correctly.

5. Follow-up standards

SITUATION	TIMING	LOG IN PIPEDRIVE
New inquiry	First response within 1 business day	Call or email activity marked done, with a note
Proposal sent	3 business days after sending, then every 5 business days	Note on the outcome; next activity scheduled
Waiting on a client reply	After 2 business days	Activity marked done with the method used
Newly awarded project	Next step confirmed within 1 business day	Next activity with a due date

Every follow-up ends with an outcome note and a next activity. Anything not completed stays as an open activity and is counted as pending in the monthly report.

6. Record standards and closeout

EVERY OPEN DEAL MUST HAVE

- Title, Person, Organization, owner, and current stage.
- Value, project type, and source (custom fields), plus Bid deadline where it applies.
- Scope notes and at least one scheduled activity with a due date.

CLOSEOUT CHECKLIST

- Final value entered in the Value field.
- Closing note added summarizing the outcome.
- Open activities completed or reassigned; key files attached.
- Deal marked Won. If it was declined or went cold, mark it Lost and choose a Lost reason.

7. Month-end reporting

1. **Clean up.** Confirm all stage moves are made and no deals are rotting or missing a next activity.
2. **Pull the stage counts.** Use an Active pipeline filter (open deals, Qualified through In Progress) and Insights deal reports for deals created, moved to Proposal Sent or Awarded, and won this month.
3. **Pull the activity counts.** Use an Insights activity report (activities done), a filter for overdue open activities (pending), a deal filter on Update time (records updated), and a filter on the Priority label.
4. **Build the closed projects table** from deals marked Won this month: title, project type, value.
5. **Compare to the previous month** by changing each filter's date range to last month.
6. **Write the review and priorities**, with numbers, then run the quality checks below and send.

8. Quality checks before sending

DONE	CHECK
☐	Snapshot figures match the Pipedrive filters and the pipeline chart.
☐	Closed project value equals the total of the Won deals in the closed projects table.
☐	Pending follow-ups equals the number of overdue open activities.
☐	No open deal is missing a next activity or has gone rotting.
☐	All reports use the same date range, and names and amounts are consistent.

9. Escalation

- Missing client contact or unclear scope: ask the deal owner the same day.
- A bid is due within 2 business days and no estimate is ready: tell the manager right away.
- Duplicate Persons, Organizations, or deals: do not delete; confirm with the owner, then use Pipedrive's merge option.

10. Document control

VERSION	DATE	CHANGE	AUTHOR
